Web Browser Security

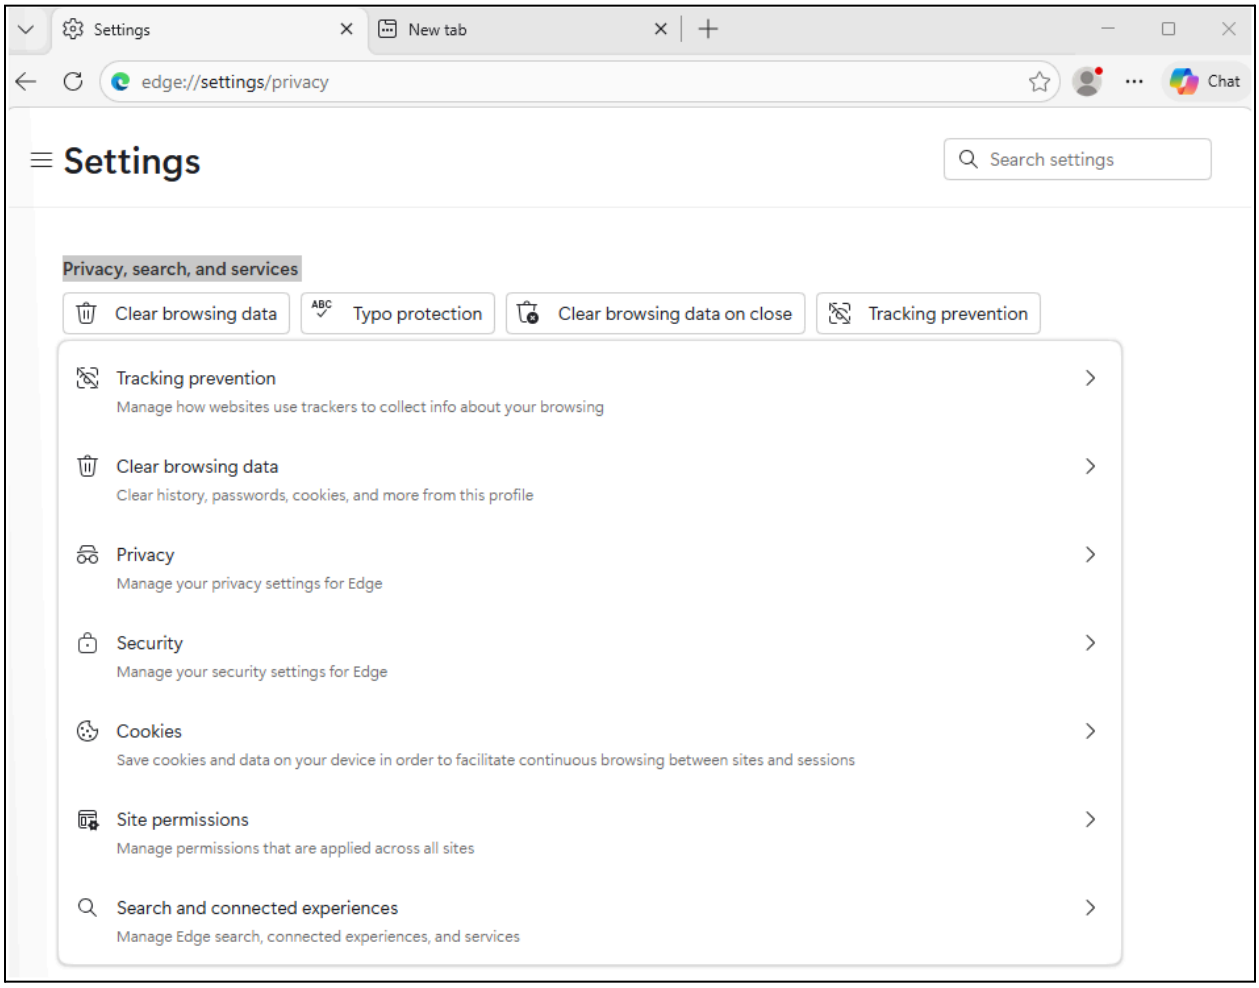
privacy, search, and services

Passwords

Clicked on the **three dots** on the top right

Or **edge://settings/profiles**

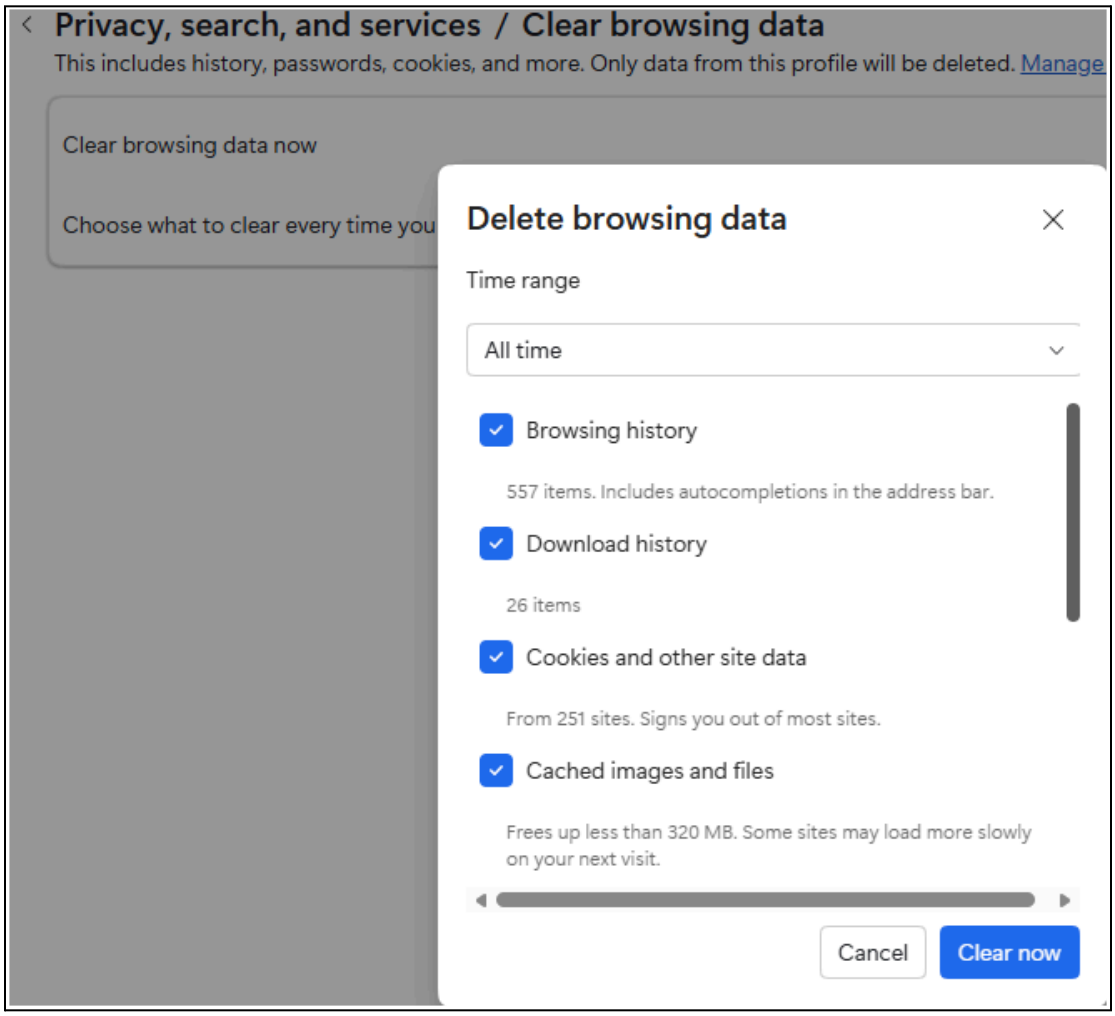
Click on **Privacy, search, and services**



If you share your computer with someone I recommend you do this: after you're done using your computer.

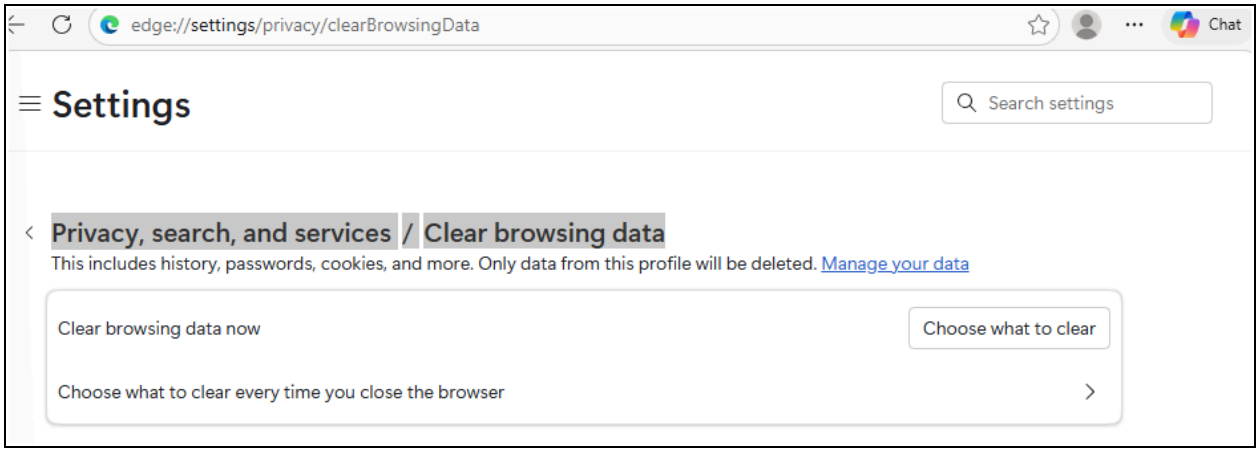
Click **Clear browsing data**

Select All time for Time range, Scroll and check everything, then click **Clear now**



In the **Privacy, search, and services /Clear browsing data** page

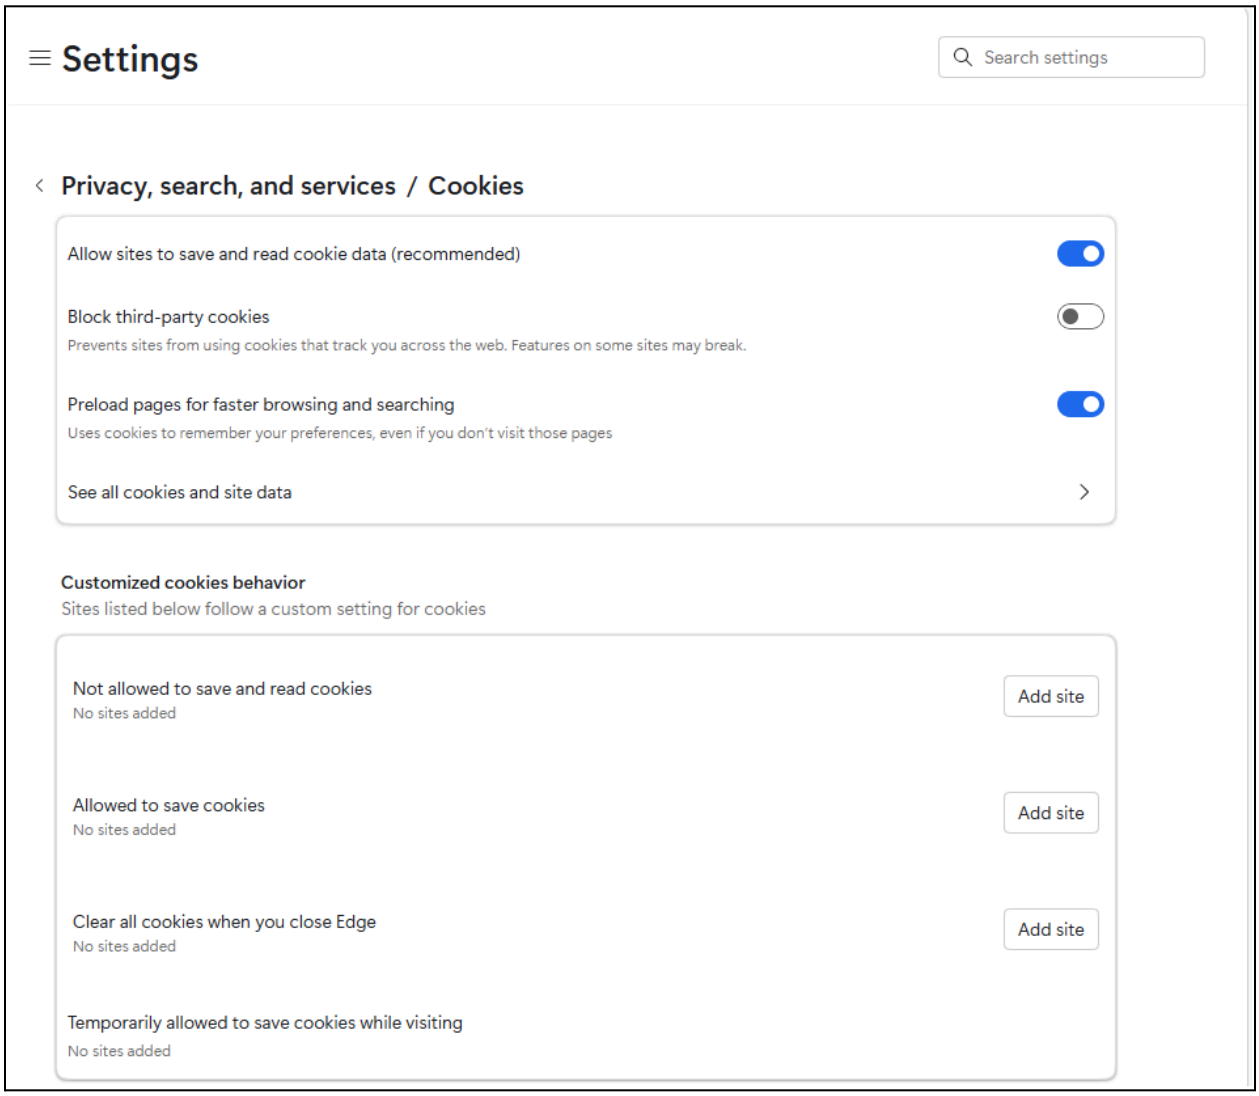
Click on **Choose what to clear every time you close the browser**.



Check everything (Do this if if you share your computer with someone)

Go back (click the back logo top left 2x) or go to **edge://settings/privacy**

Click on **Cookies**

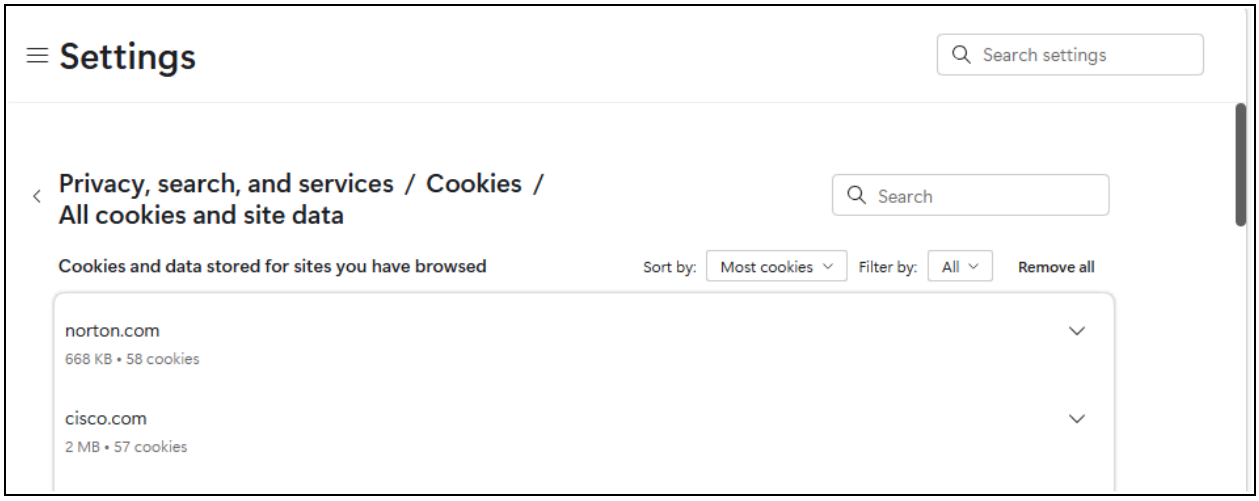


To disable Third party cookies click enable **Block third-party cookies** They are usually used for tracking, advertising and analytics.

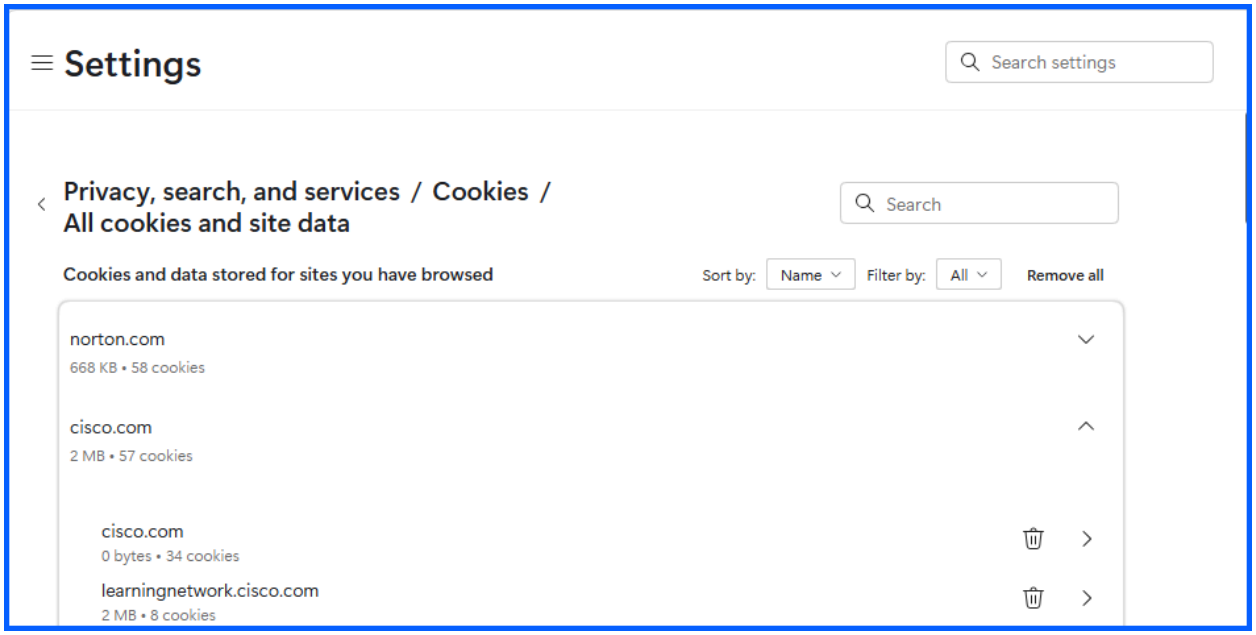
Under **Customized cookies behavior** you can add:

- Sites that are not allowed to save and read cookies
- Sites that are allowed to save cookies
- Clear all cookies when you close Edge

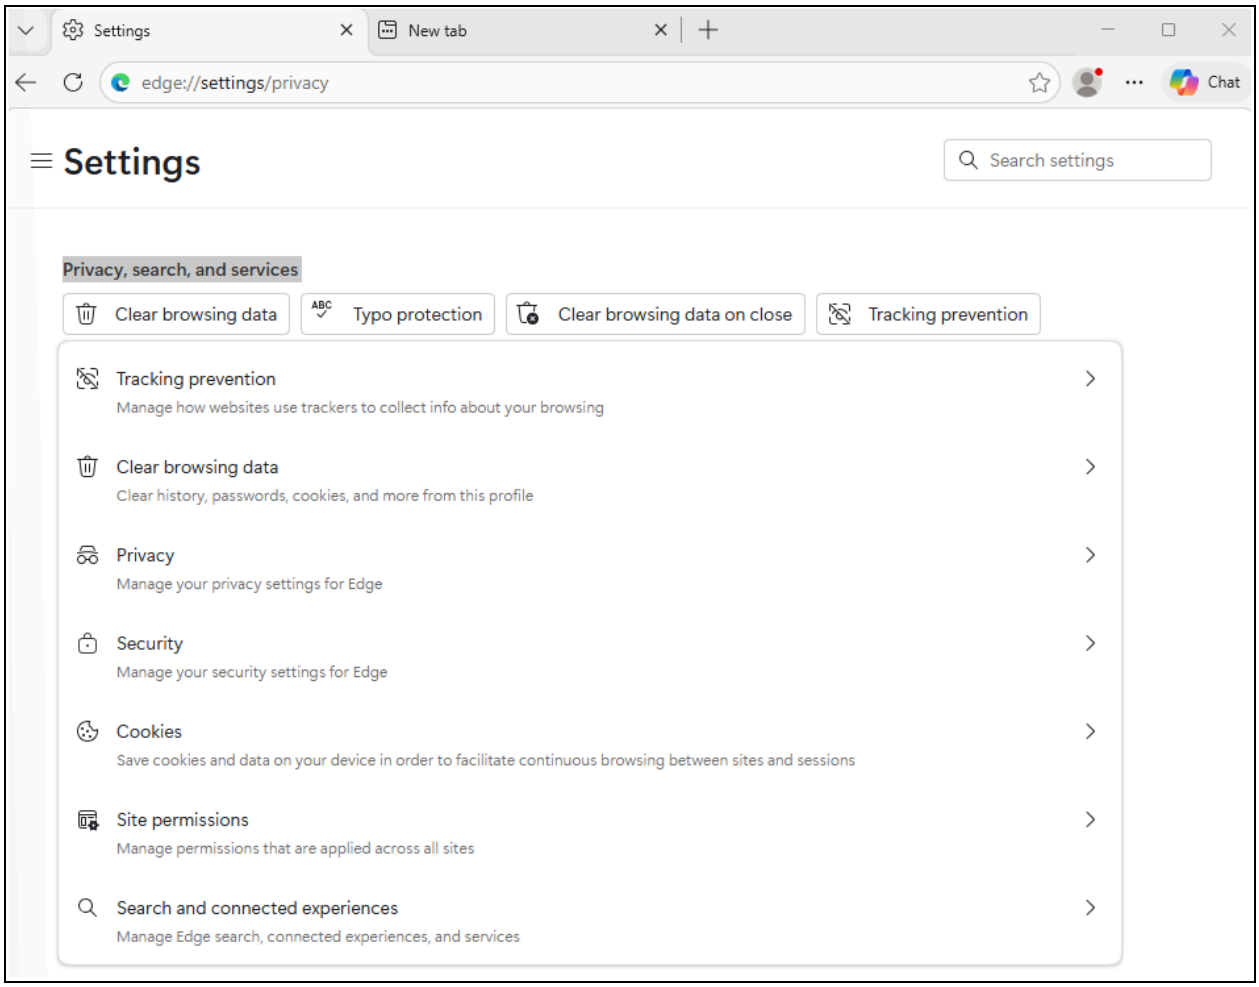
Click on **see all cookies and site data.**



You can click on a site, expand and delete specific cookies

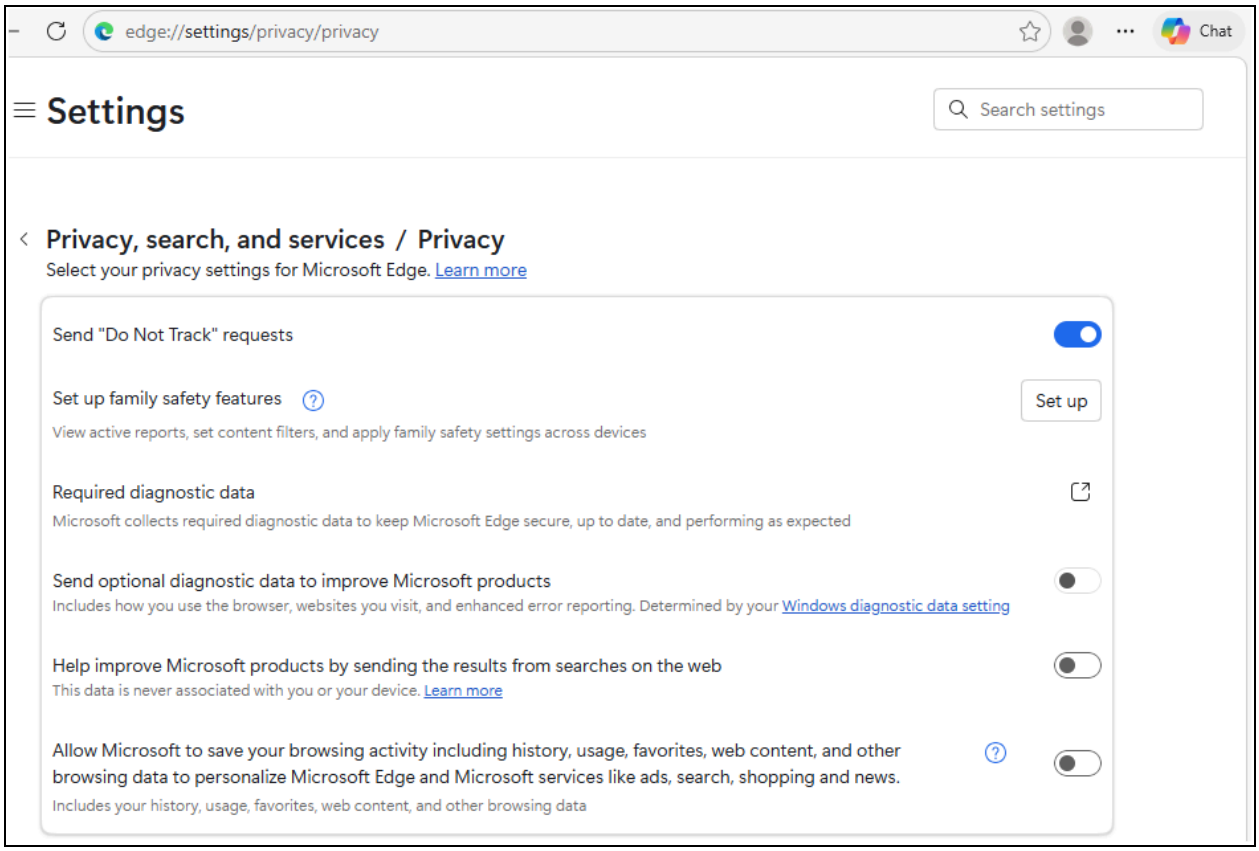


Go back (click back logo 2x)



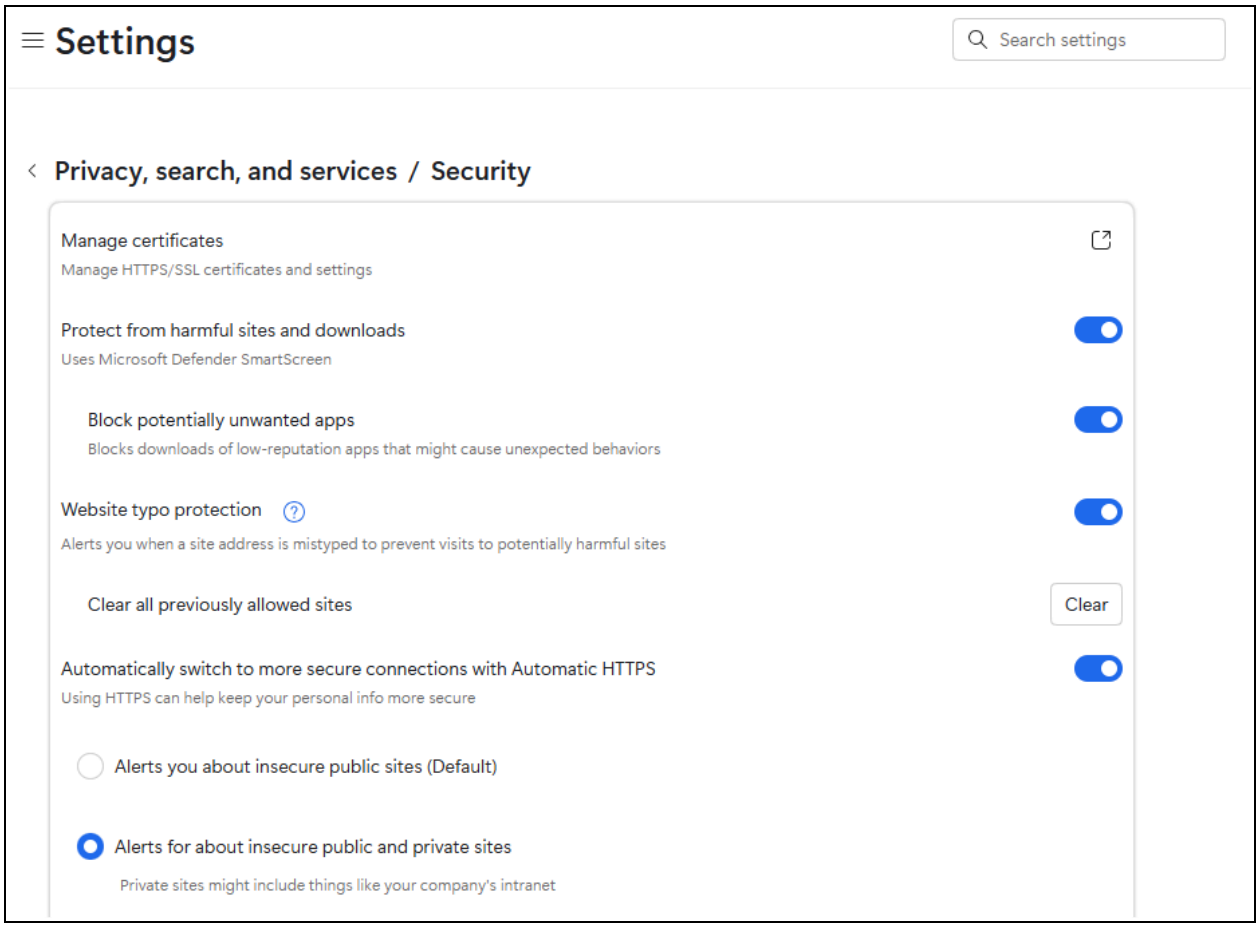
Click on **Privacy**
Enable Send "**Do Not Track**" requests, then click send request

You can enable the last two if you want they are for your personalization



Go back (click back logo)

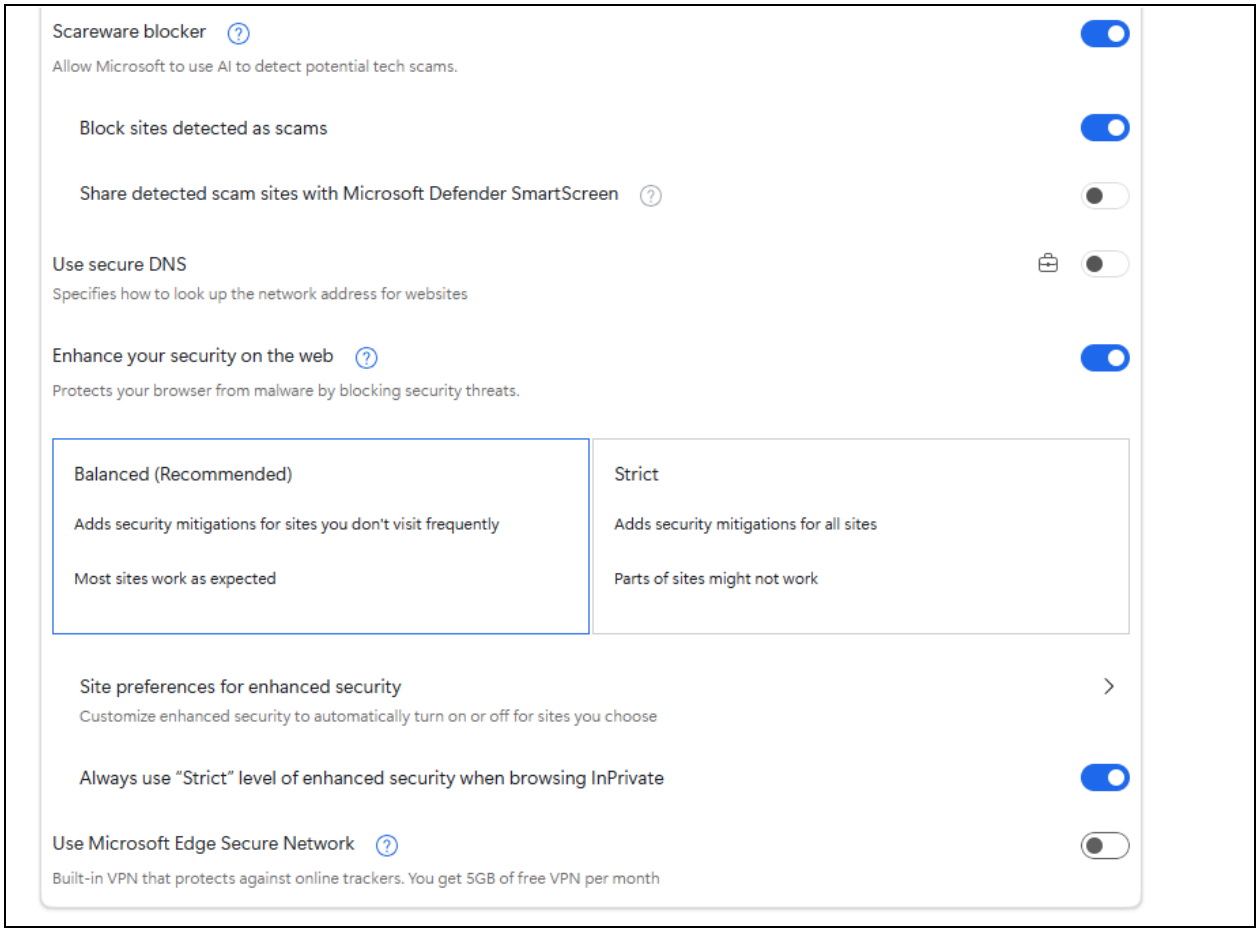
Click on **Security**



Enable:

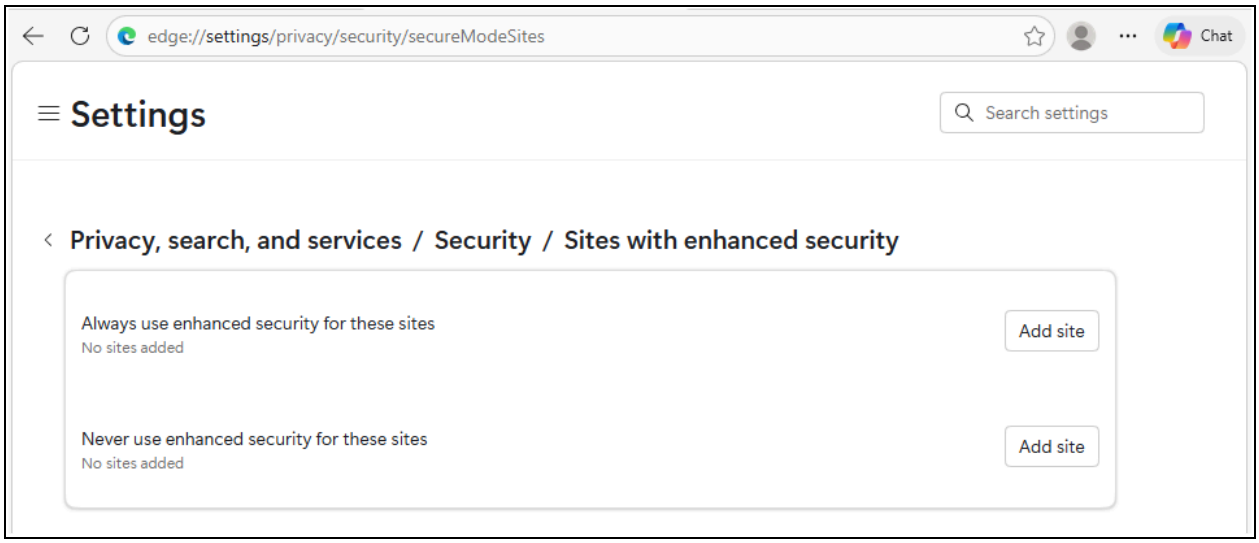
- Protect from harmful sites and downloads
- Block potentially unwanted apps
- Websites typo protection
- Automatically switch to more secure connections with Automatic HTTPS
- Select Alerts for about insecure public and private sites

Note if you have problems download something you can change these settings



Enable **Scareware blocker**
Enable **block sites detected as scams**
Under **Enhanced your security on the web** you can choose Strict, just know some sites may not work, if that happens change this setting back to balanced.
Enable **Use Microsoft Edge Secure Network**
You can set up **Microsoft's VPN**

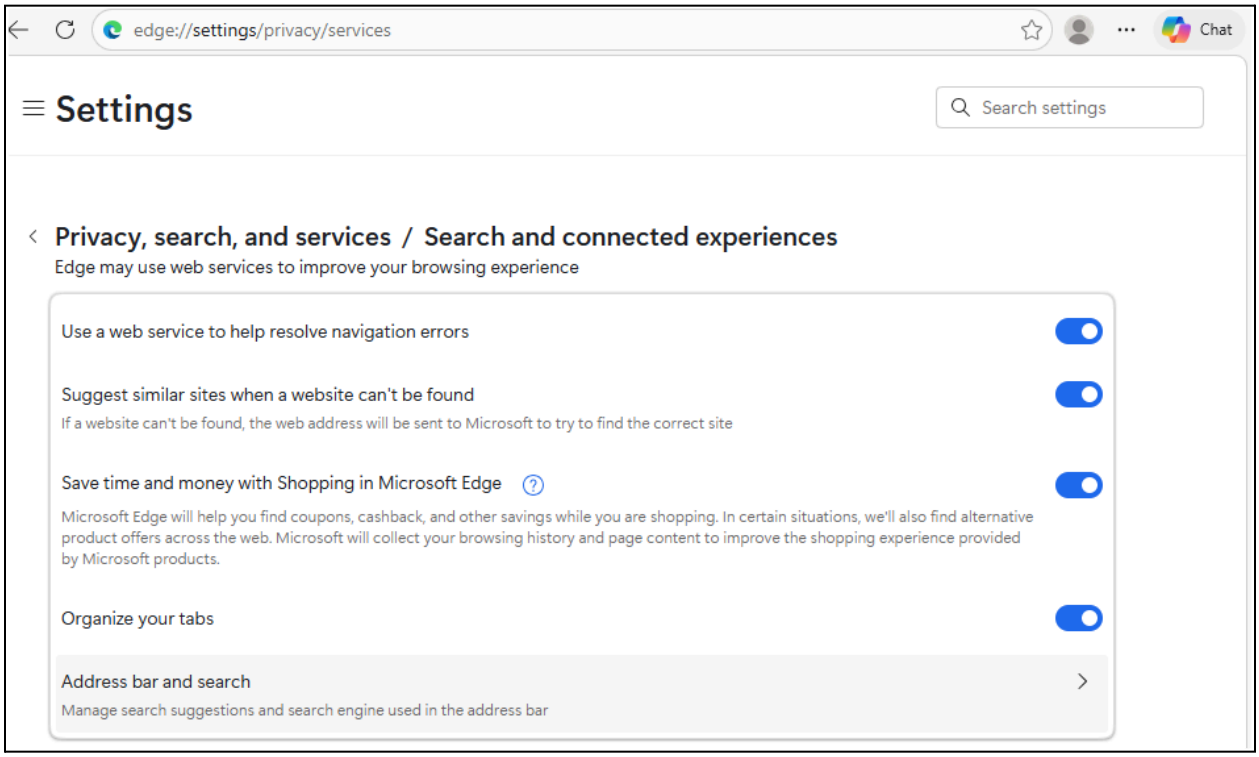
Click on **Site preference for enhance security** to configure sites to use with enhance security



Go back (click back logo 2x)

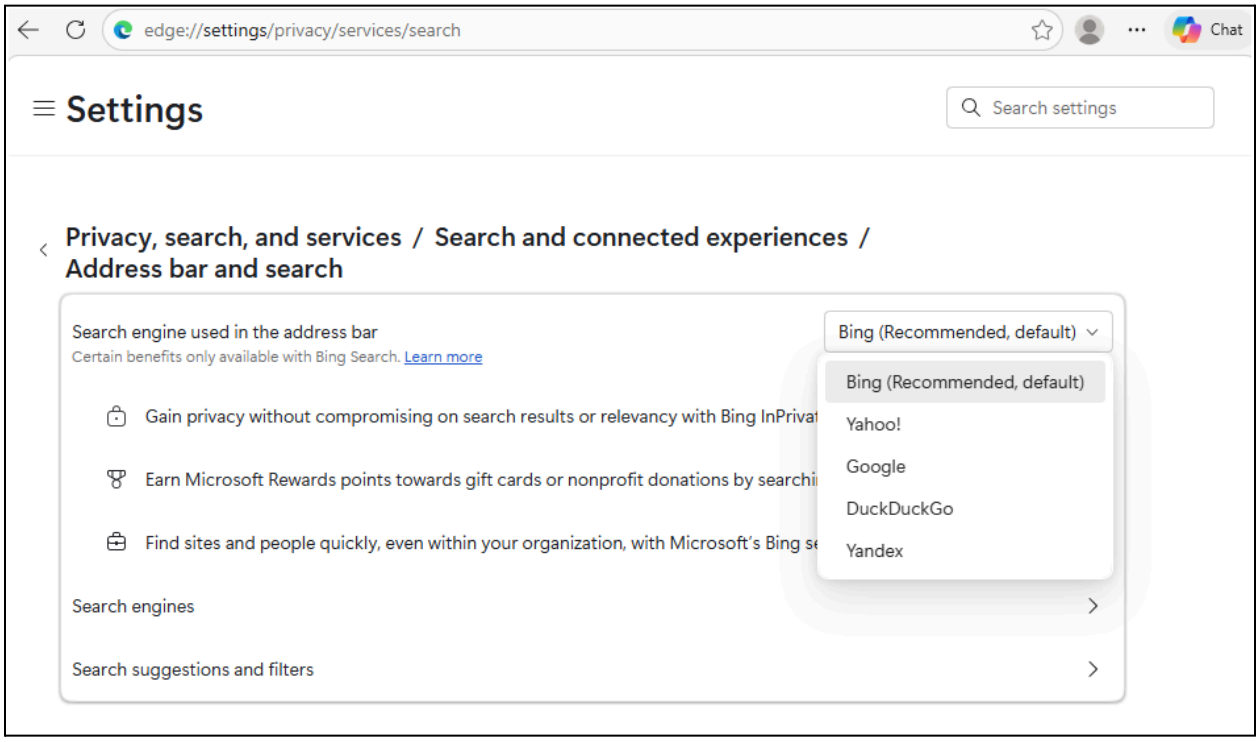
Click on Sites permission to view or modify them

Click on **Search and connected experiences**



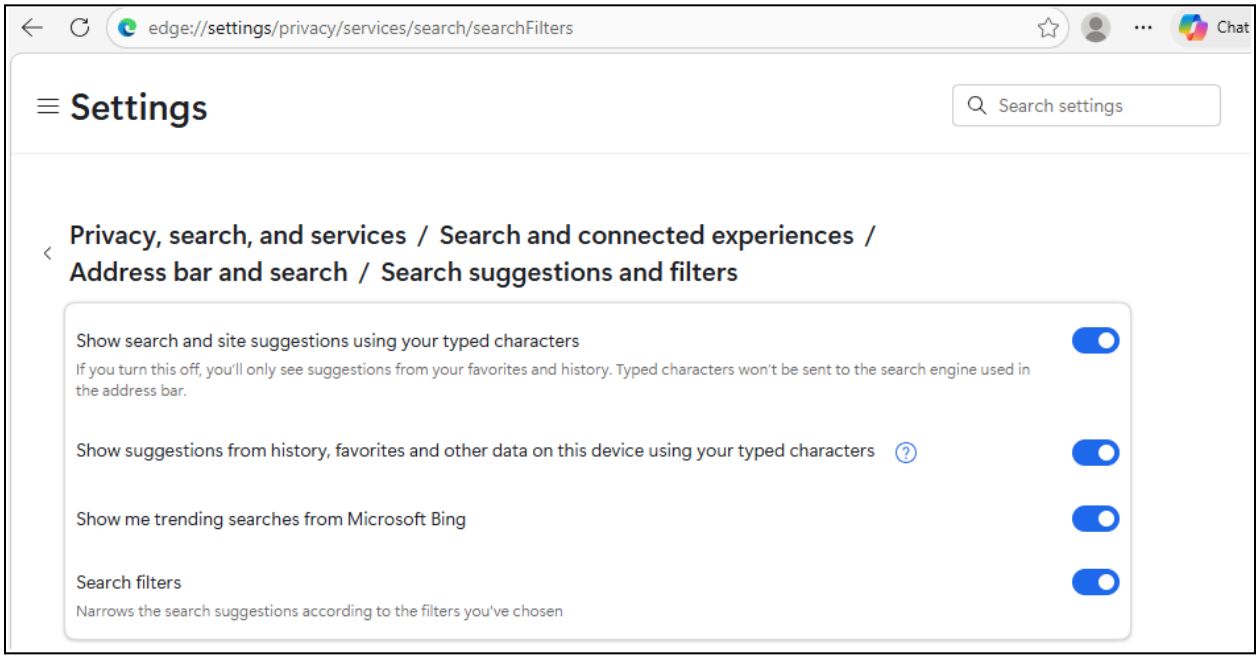
You can leave all these settings enabled

Click on **Address bar and search**



Here you can change your **search engine** here

Click on **Search suggestions and filters**



You can leave the options enabled.
