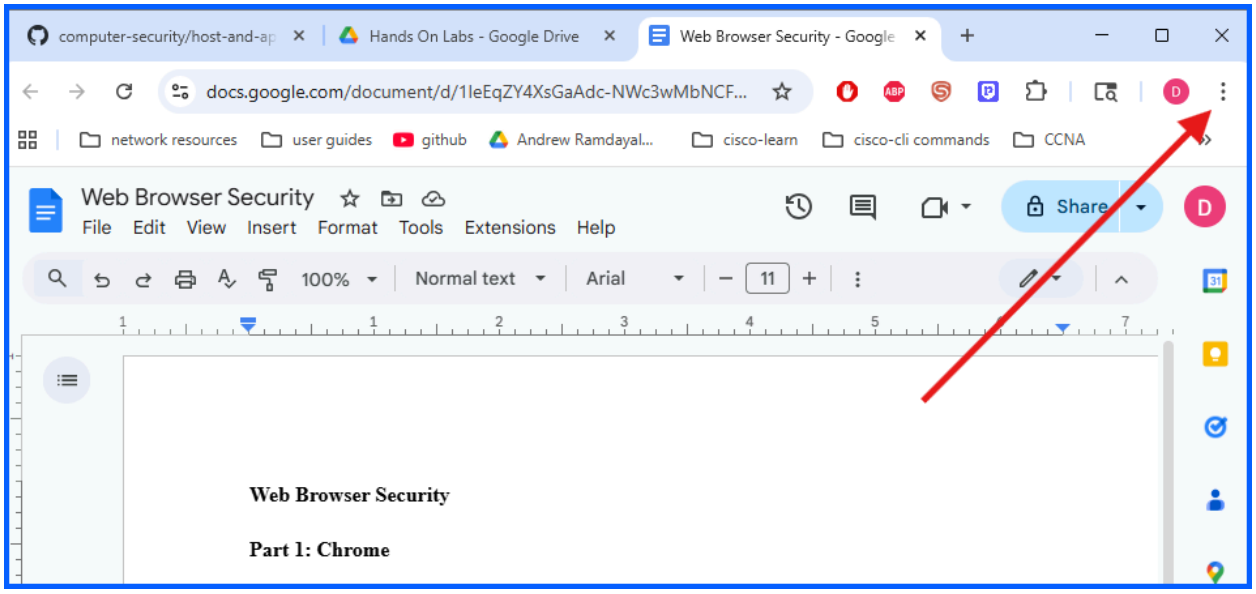
Web Browser Security

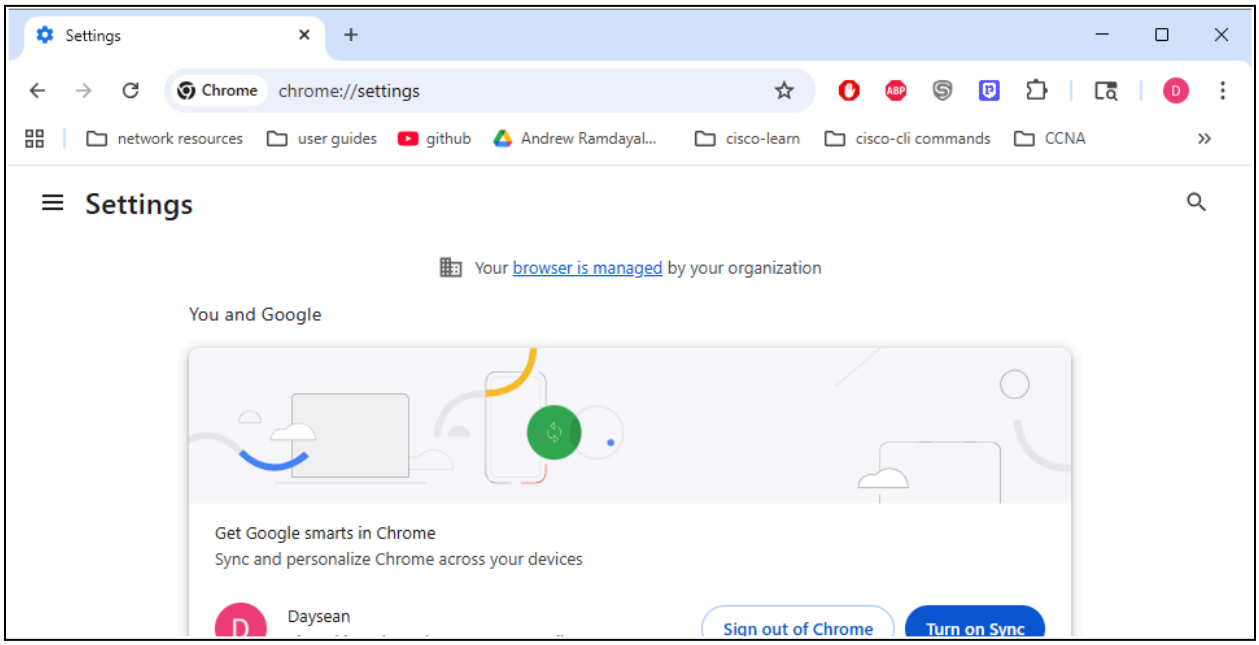
Privacy and Security

Clicked on the **three dots** on the top right



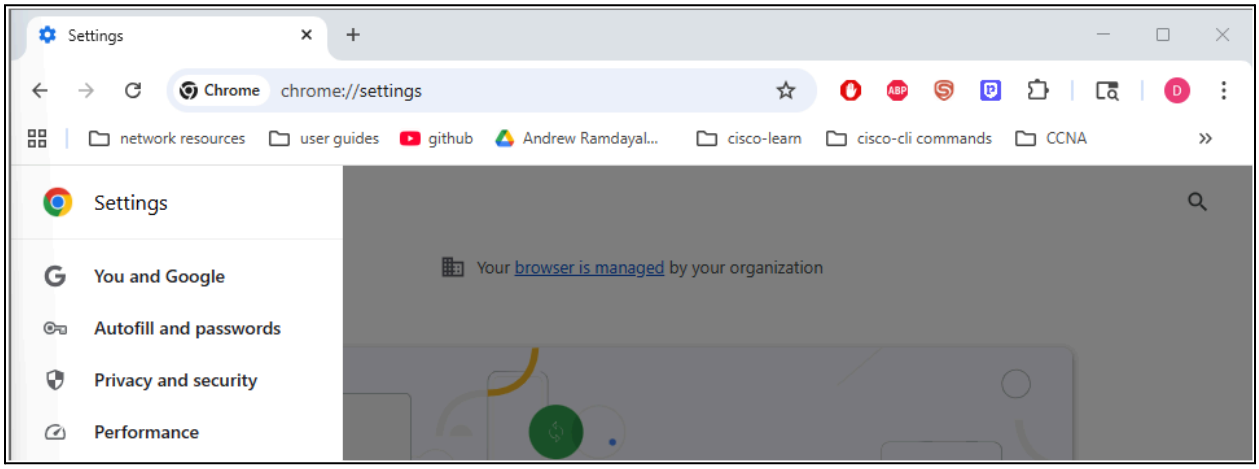
Or search: **chrome://settings/**

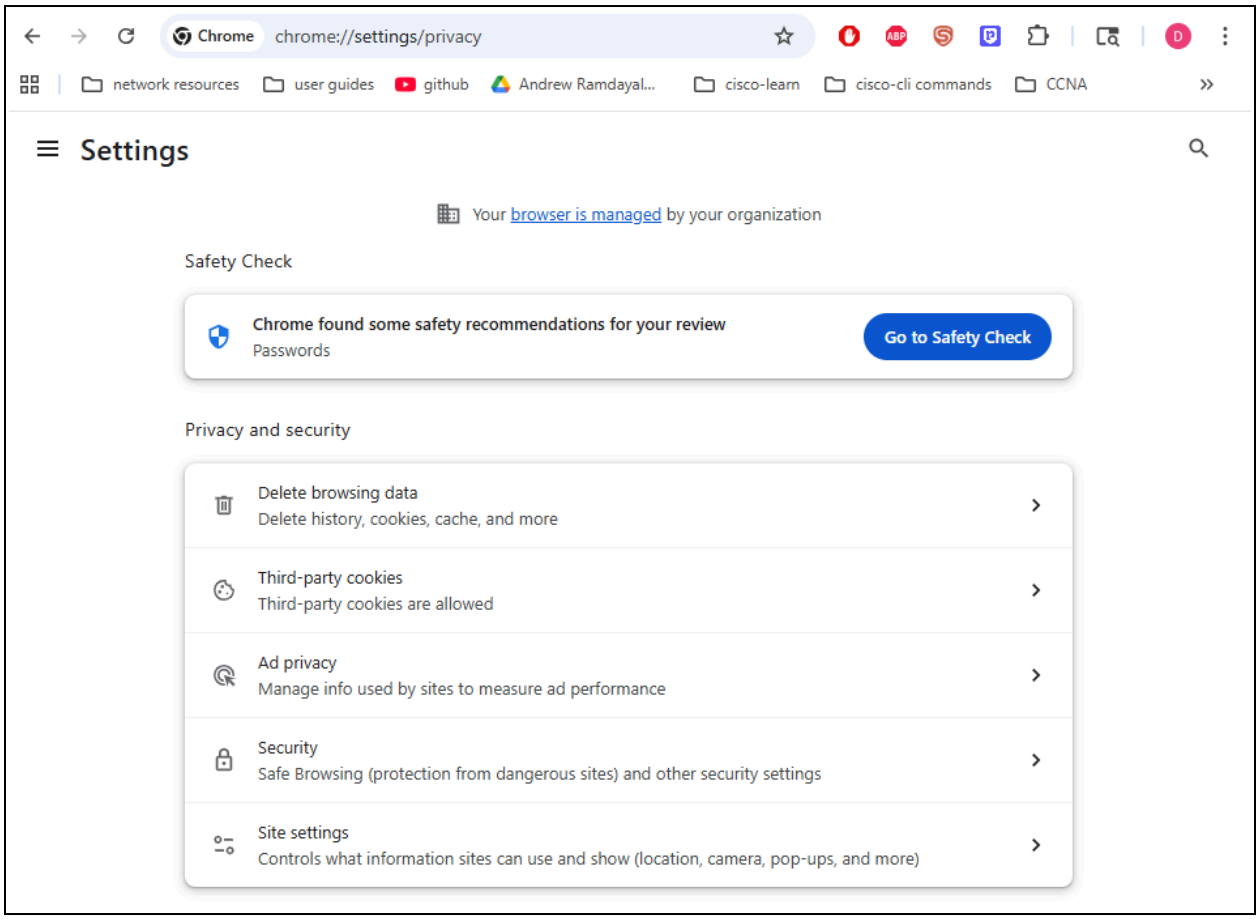
Clicked on the **3 horizontal lines** on the top left



Note: Ive split my screen into 2 thats why I have the **3 horizontal lines** but if your in full screen you will see the menu on the left side

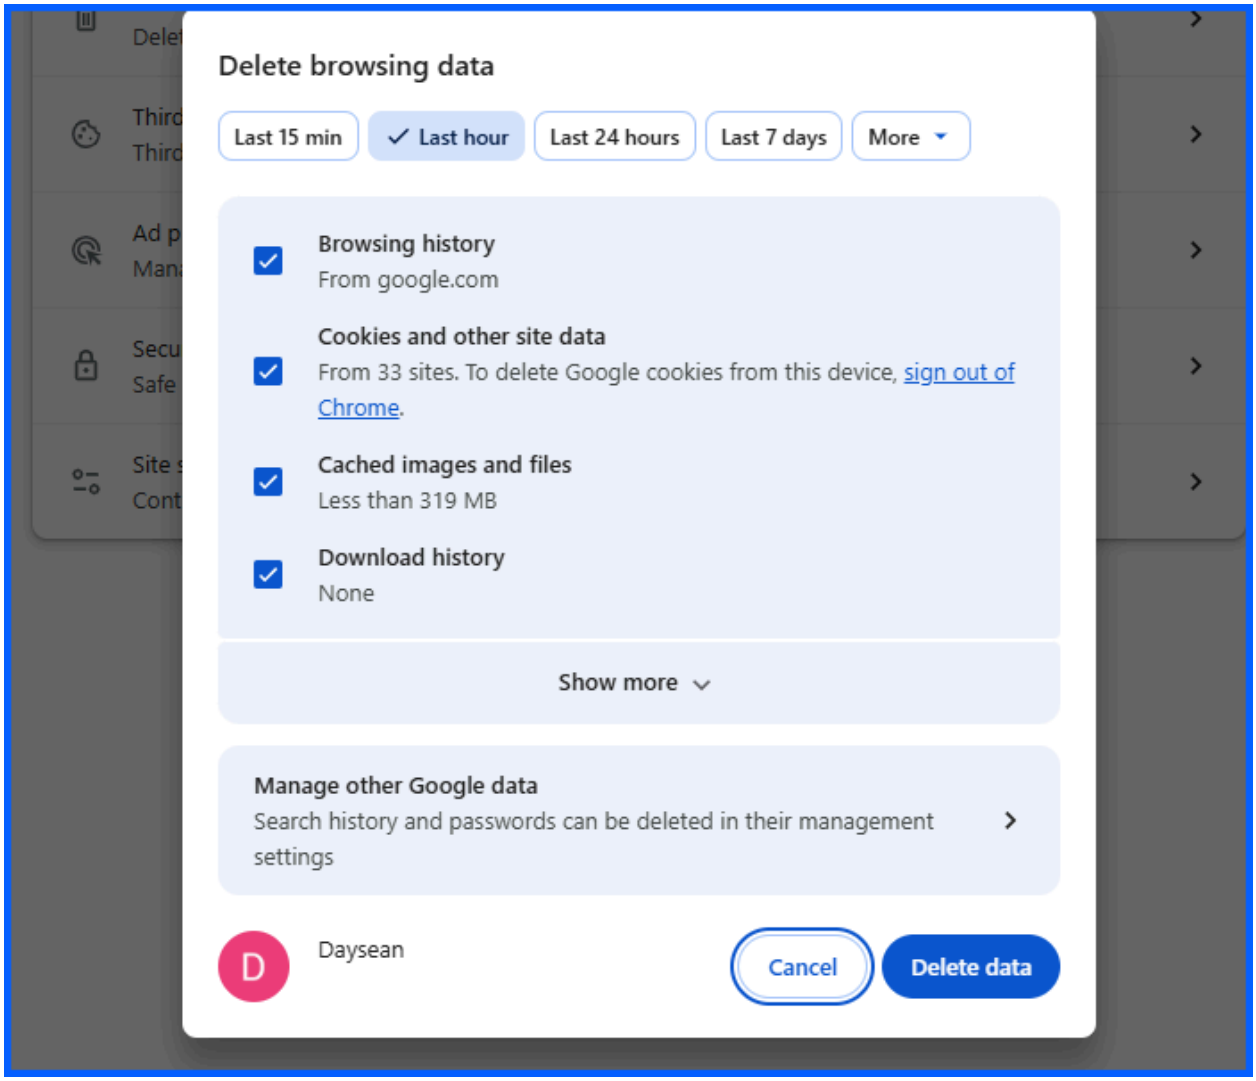
Click Privacy and Security



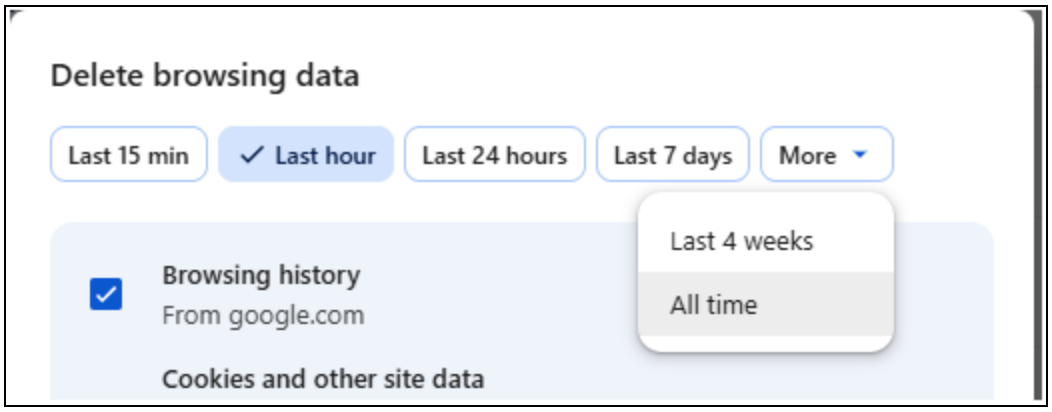


If you share your computer with someone I recommend you do this: Delete browsing data after you're done using your computer.

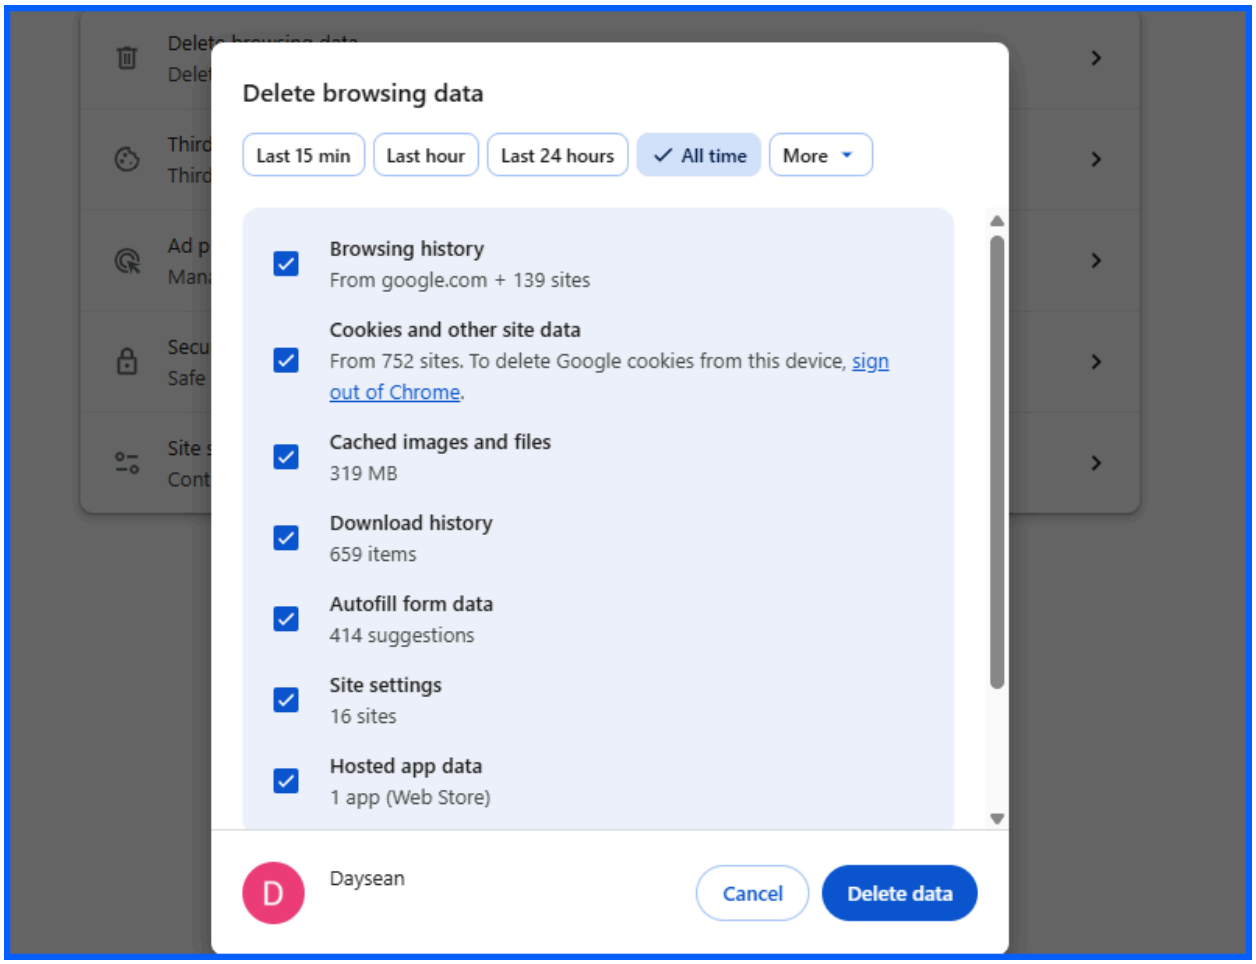
Click **Delete browsing data**



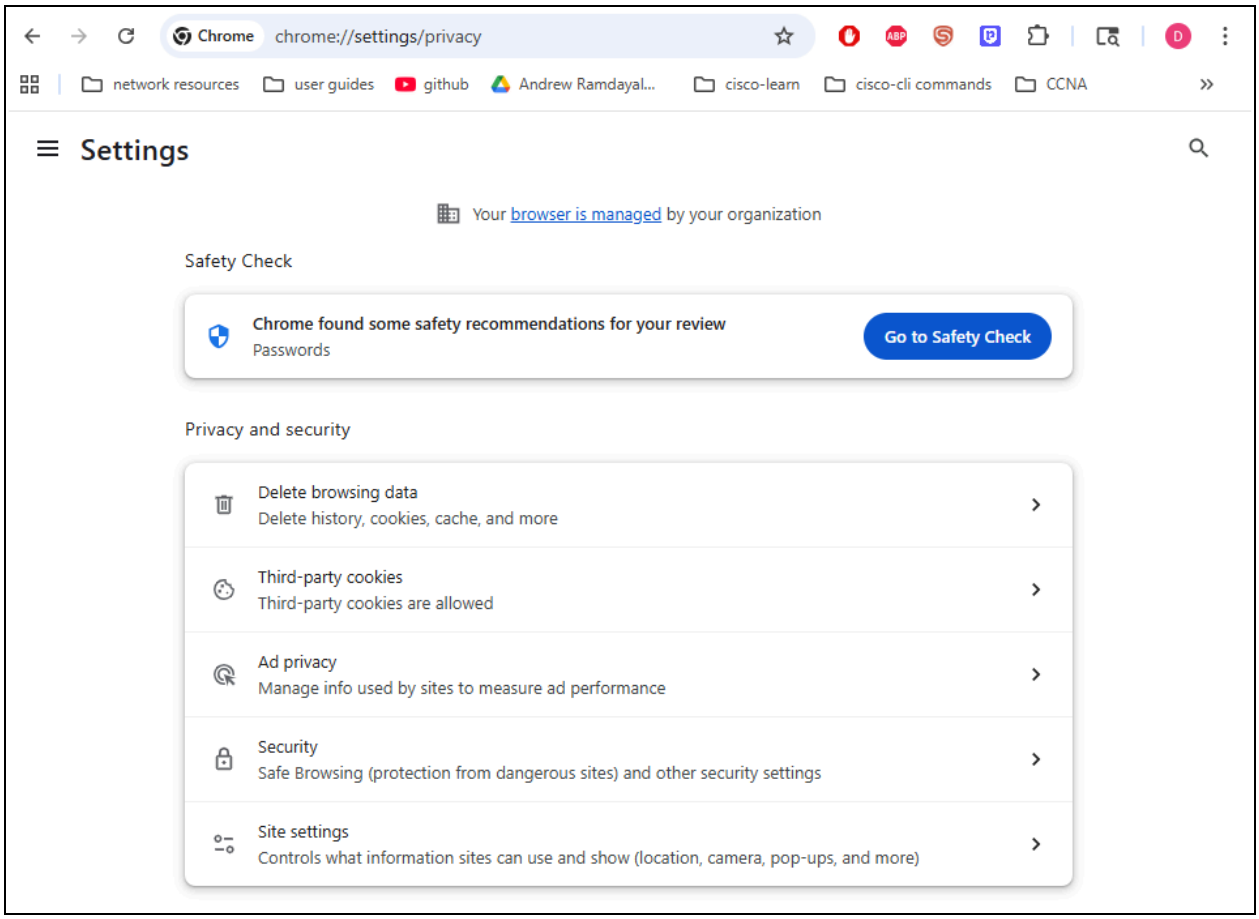
Click More, Click All time



Click Show more. Check everything then delete.

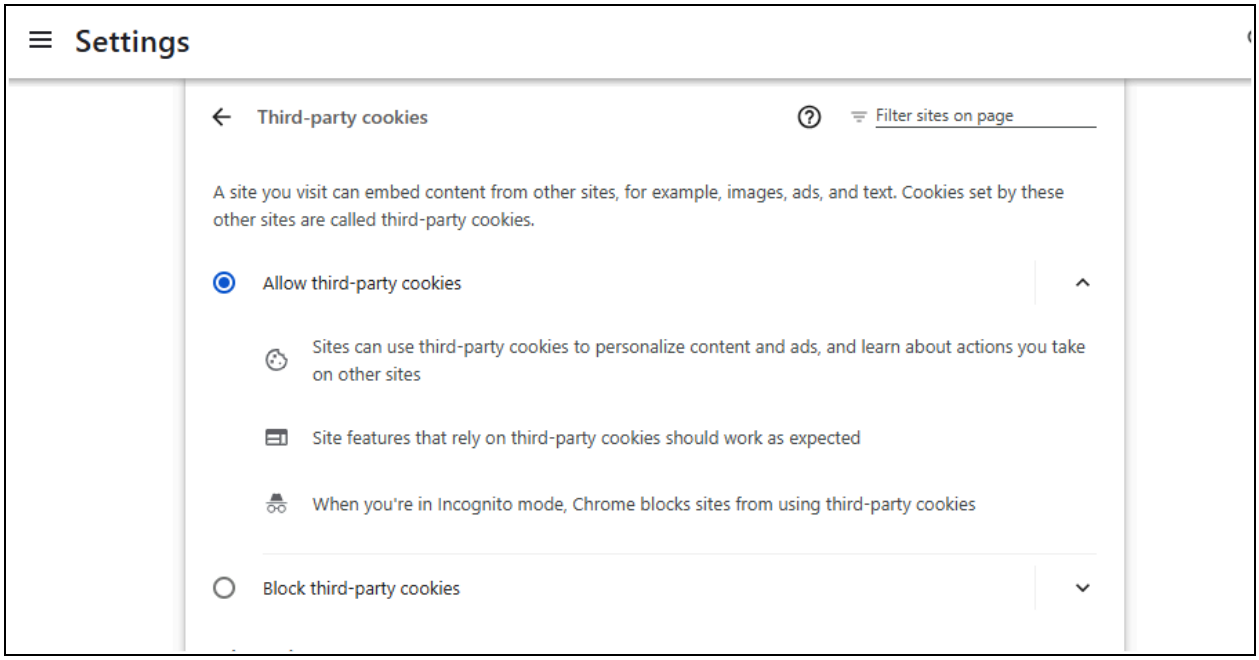


Back in **chrome://settings/privacy**

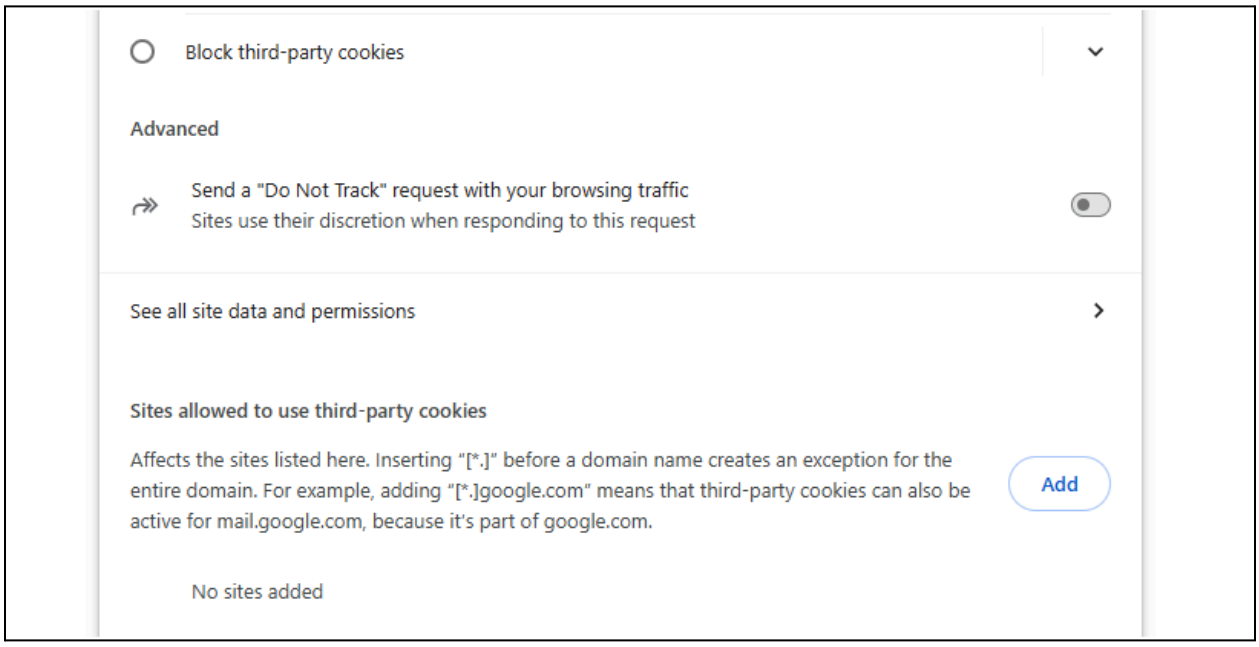


To disable Third party cookies click on **Third-party cookies**

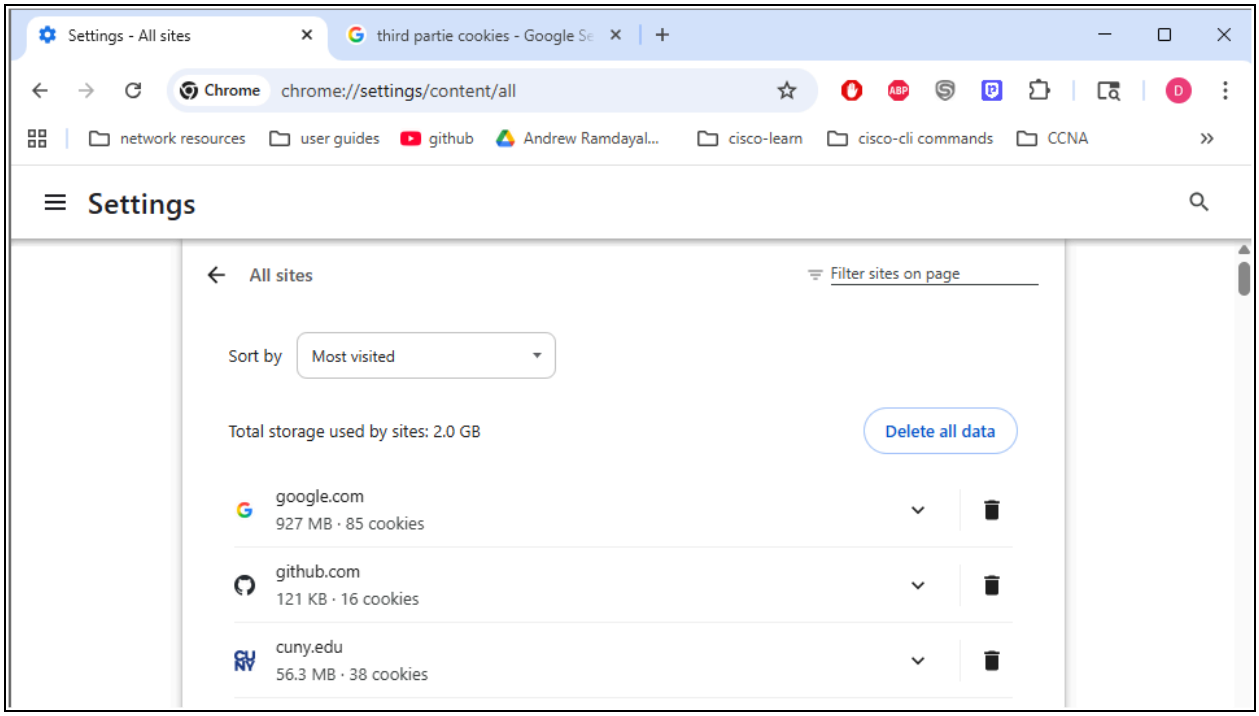
Then block **third-party cookies.** They are usually used for tracking, advertising and analytics.



Click on **Add** bellow **site allowed to use third-party cookies** to add allow sites



Click on **See all site data and permissions** to view, change or delete them them

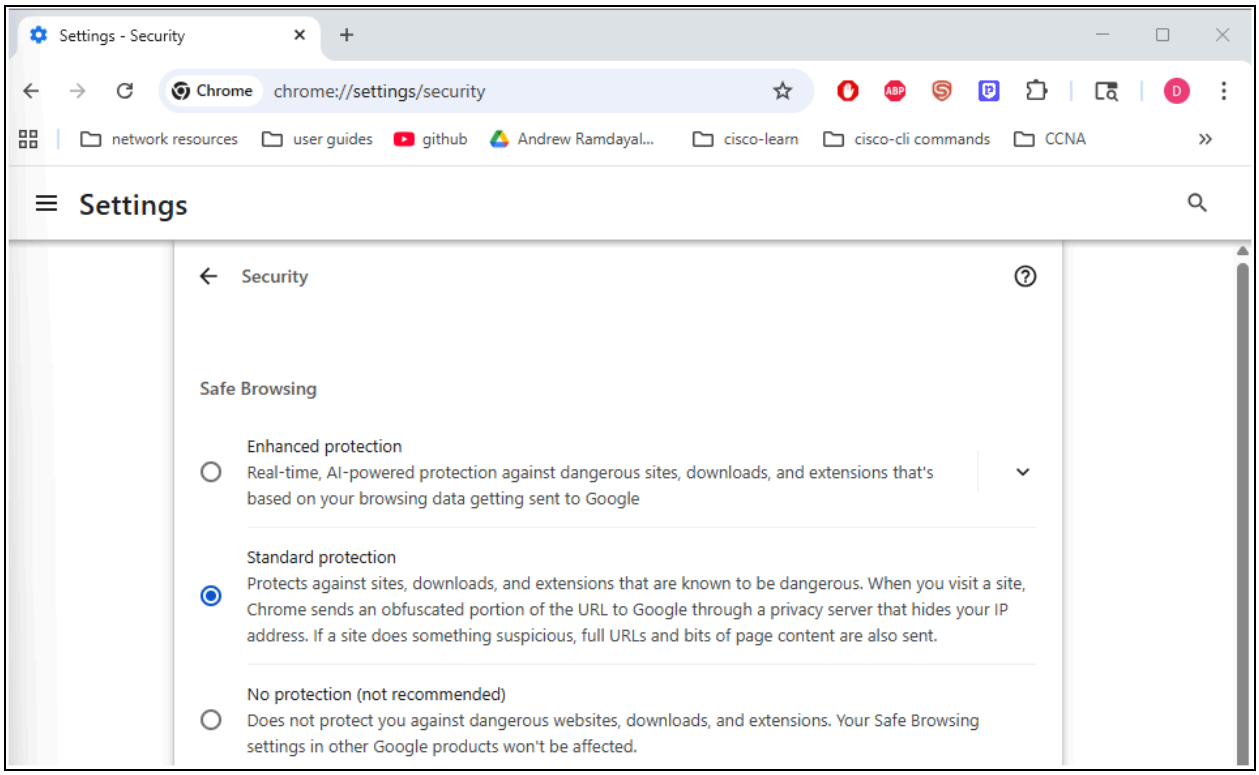


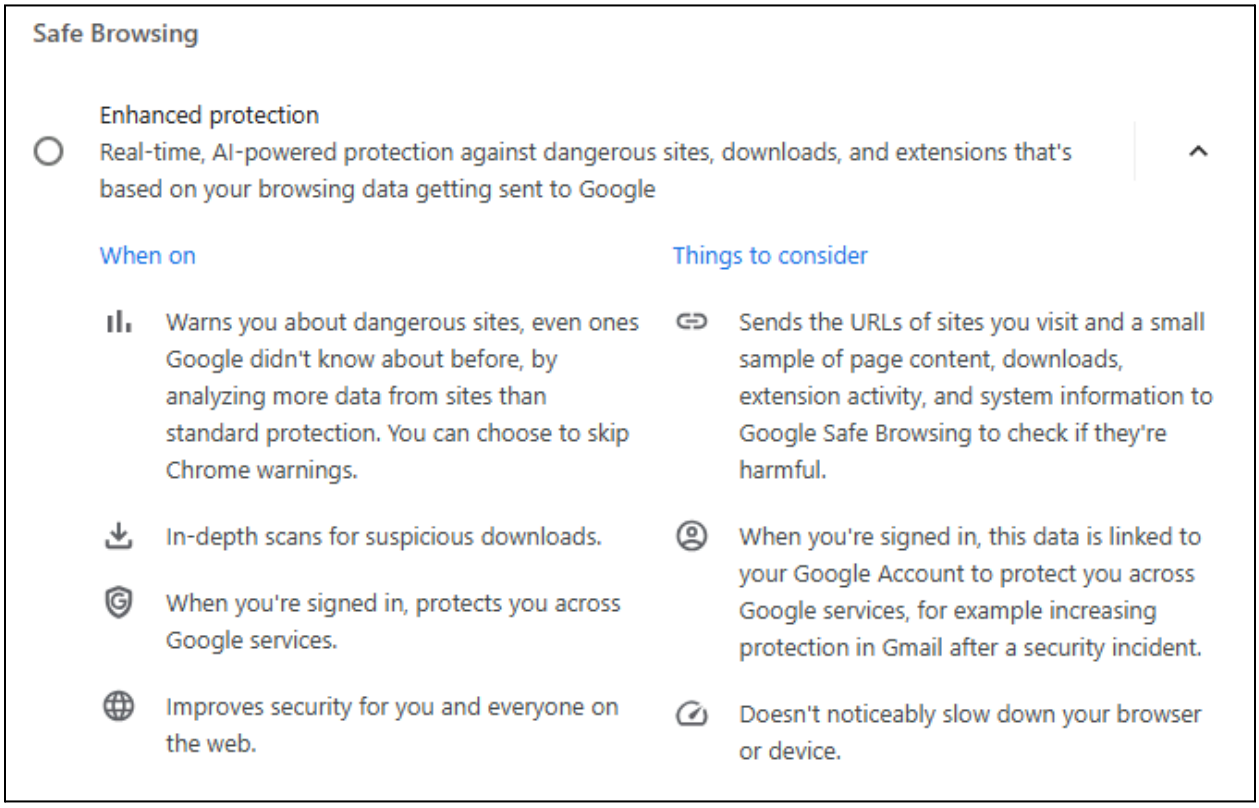
Back in **chrome://settings/privacy**

You can turn of **ad measurement** if you want by clicking on **Ad privacy** then Ad measurement

Click on **Security**

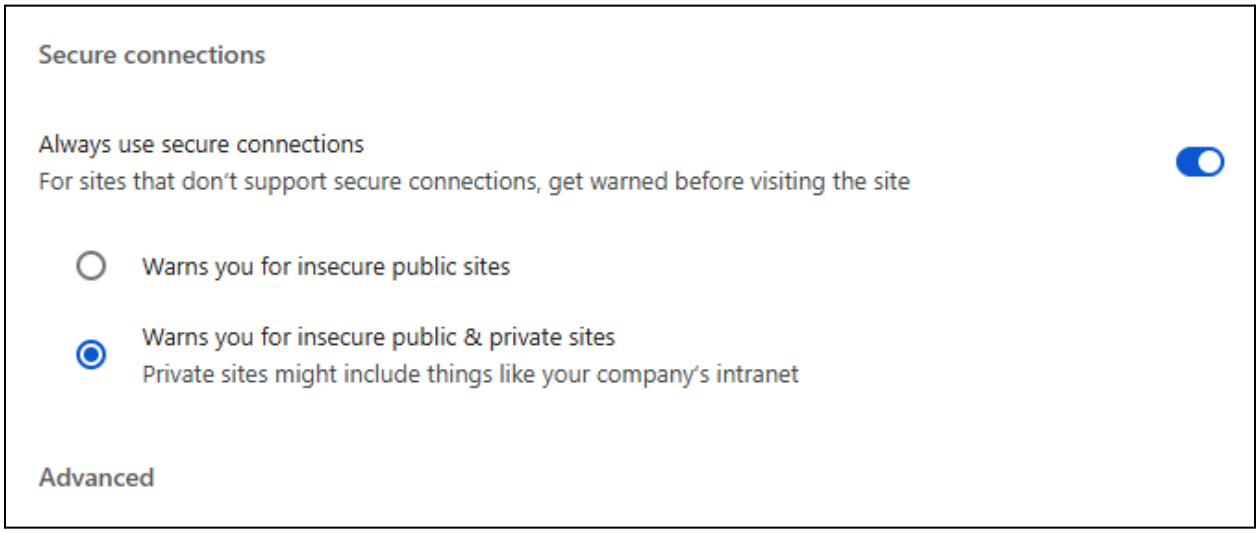
Check **Enhanced protection**. This uses AI-powered protection against dangerous sites



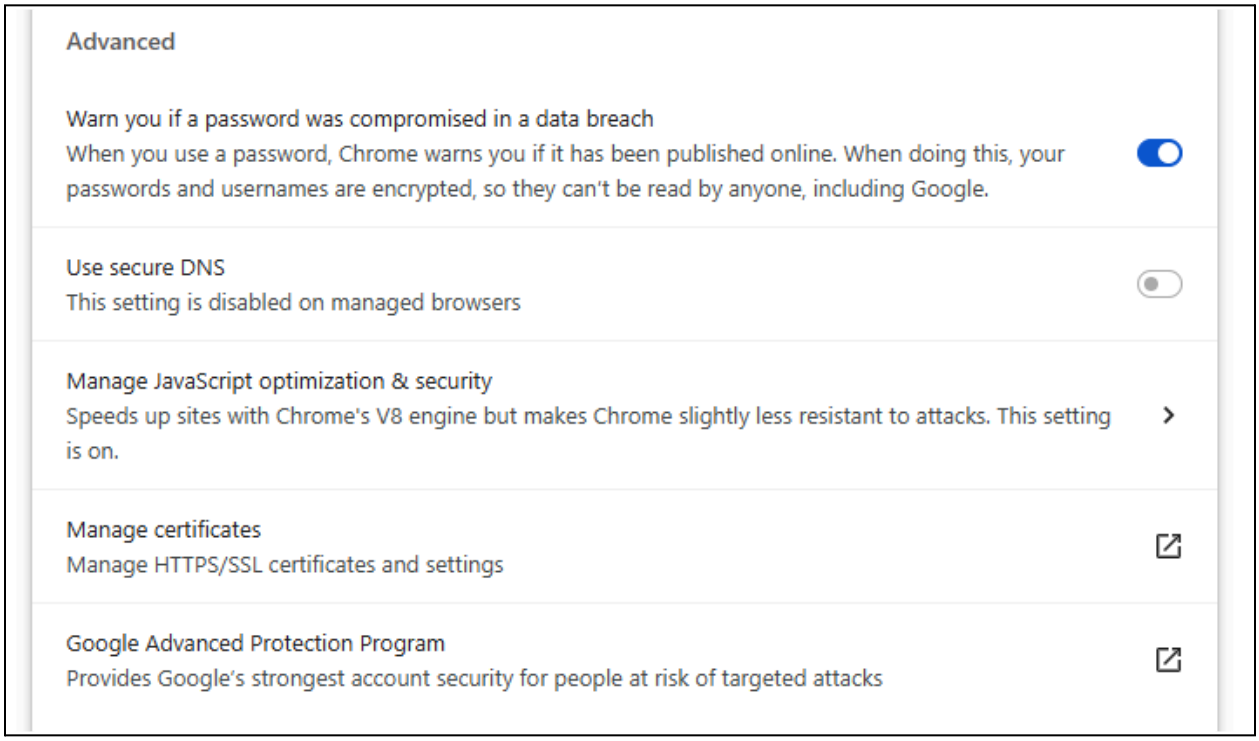


Under secure connection. Enable **Always use secure connections**

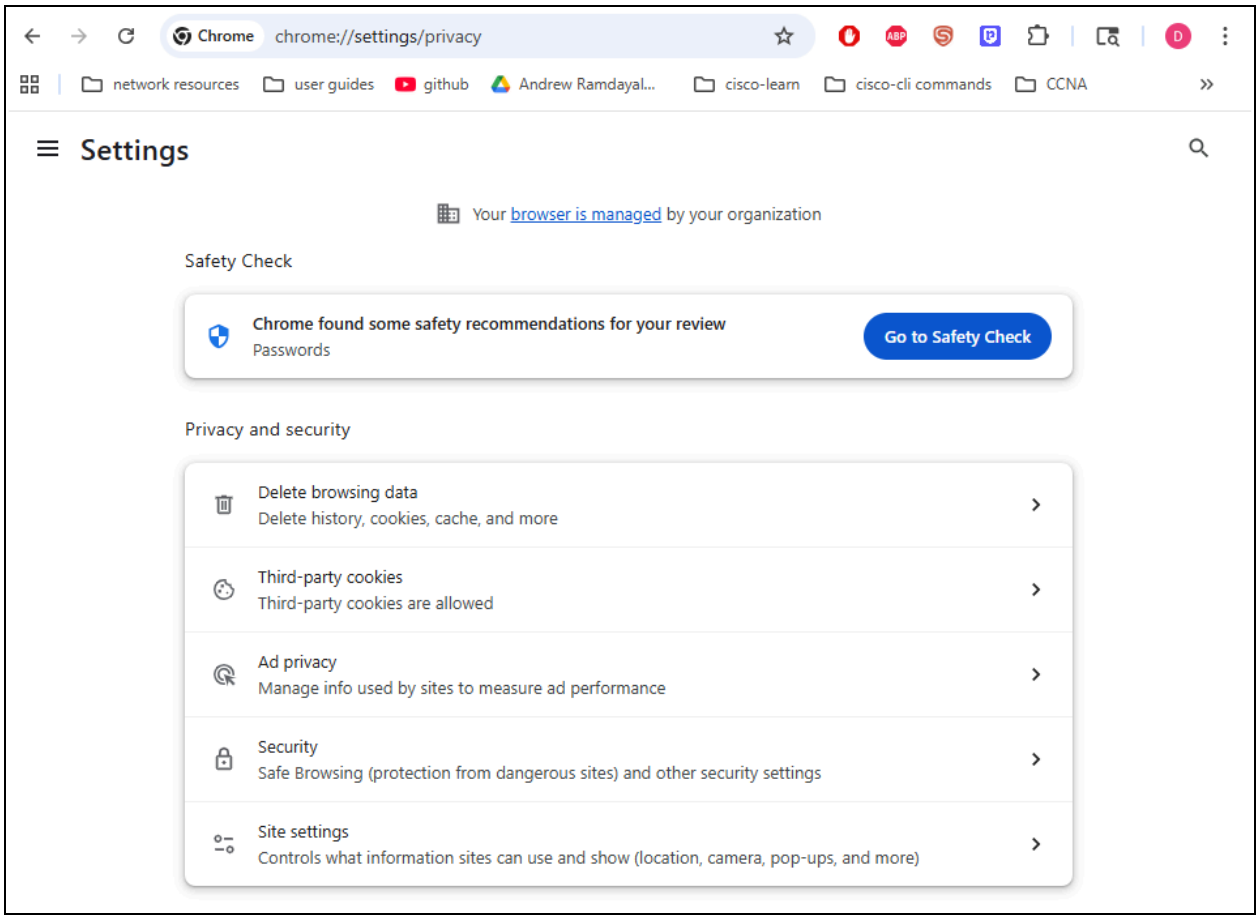
Then check **Warns you for insecure public & private sites**



Under **Advanced**. Make sure Warn **if a password was compromised in a data breach** is checked.

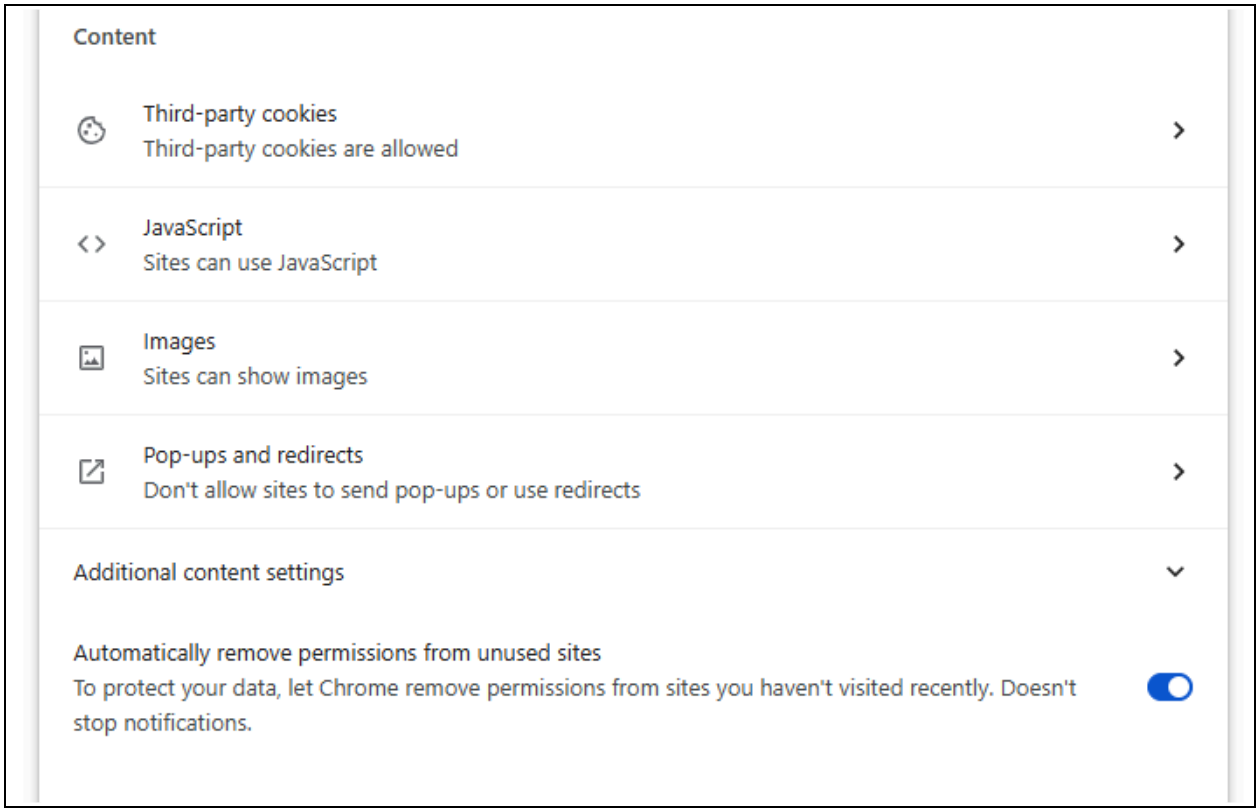


Back in **chrome://settings/privacy**

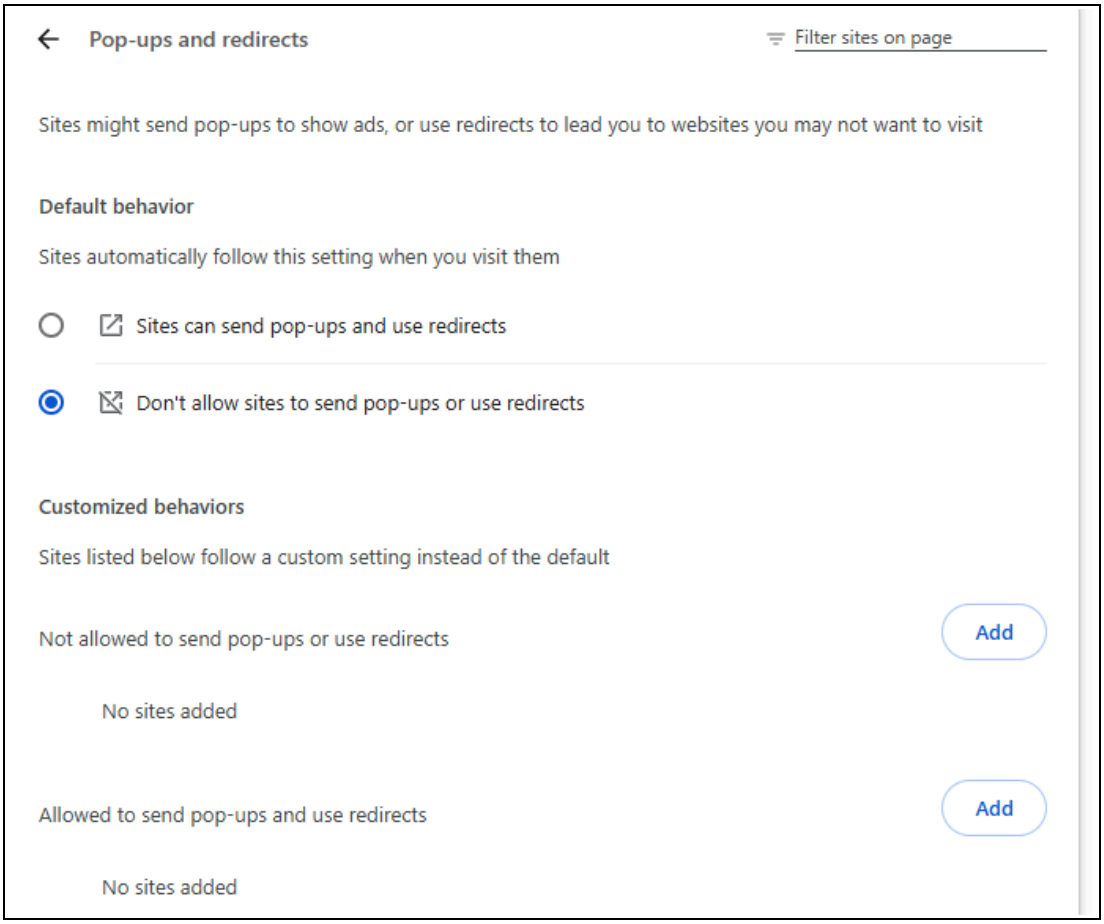


Pop up ad redirects

Click on **site settings** (site settings shows you site permissions and content such as cookies, JavaScript, Images, and Pop-ups and redirects). Scroll down



Ensure **Don't allow sites to send pop-ups or use redirects** is checked



You can add sites to allow or disable pop ups and redirects.
